
SCRUM Meeting 3 for Sprint 1

Prepared by: Rose Soriano

Meeting Date: 11/6/21

Meeting Attendees

1. Joshua Kim
2. Brianna Navas
3. Daniel Chamorro
4. Sung Rung Yoo
5. Rose Soriano

Meeting Agenda Items

- Talk about individual task completion since previous meeting
- Discuss Spotify API status
- Plan for Sprint 1 deliverable completion
- Discuss team standard for pushing to GitHub

Status Update Since Last Meeting

Accomplishments:

- Rose:
 - Wrote AWS deployment doc
 - Tracking which AWS services we're using as a reference for the rest of the group
 - Deciding which features of the AWS service we'll use
- Brianna:
 - Selected WCAG AA compliant color scheme
 - Selected a font
 - Started research for background images and testing with site
- Daniel:
 - Made navbar responsive for mobile
 - Debugged Spotify bar issue
- Sung:
 - Watched Flask tutorial
- Josh
 - Watched Flask tutorial

Tasks Completed:

Task Description	Assigned to	Completed? (yes/no)
Set up AWS EC2 instance	Rose	yes
Set up AWS S3 bucket	Rose	yes
Finish watching Flask Tutorial video	Sung, Josh	yes
Define Font and Color Scheme for Site	Brianna	yes
Choose background images and building images for site	Brianna	no

Before The Next Meeting

Plans:

- Finish Sprint 1 Project Deliverables
- Have final images for site
- User test with site

Task Assignments:

Task Description	Assigned to
Provide url to hosted website domain from AWS	Rose
Finalize background and icon images for site	Brianna
Replace background image on homepage of website and make it's dimensions responsive to the display size.	Daniel
Finish integrating navbar on all pages and add poke-guide logo	Daniel
Reorganize html to extend base	Sung
Create Team Composition and HM/TM page	Rose, Brianna
Github, create separate branches for testing	Josh
Connect basic flask setup with frontend	Sung, Josh, Daniel
Make spotify song loop indefinitely or make spotify smaller and put it into a better location on the page	Daniel, Josh
Redesign nav bar with new color schemes and fonts	Sung
Conduct a user study on Sprint 1 site	Brianna

Minutes from Previous Meeting

We discussed our different findings with the API so far. We found that our current site image folder was located in the general HTML folder. This means that external users who accessed the site couldn't see the site images. We discussed how to fix this and now the images can be seen by any user. We discussed setting up AWS and which tutorials we needed to watch for learning how to use Flask. We debated using React vs Flask for our Front-End. We currently had the site built in Bootstrap. Ultimately, we decided to use Bootstrap and Flask for the Front-End. This is because we wanted simplification for our Front-End code and didn't have a solid enough reason to change our current code for it. A color scheme and font that considered accessibility for our site were also brought up. The group collectively decided after looking at some options that we would use the Nintendo Red and White for colors. We also chose Roboto Mono for the font since it looks like a classic game font but is still easily readable.
