
SCRUM Meeting 1 for Sprint 2

Prepared by: Brianna Navas

Meeting Date: 11/11/21

Meeting Attendees

1. Joshua Kim
2. Brianna Navas
3. Daniel Chamorro
4. Sung Rung Yoo
5. Rose Soriano

Meeting Agenda Items

- Talk about updates with website code
- Plans for user study reports
- Research API
- What we learned about Flask/running our code in Flask

Status Update Since Last Meeting

Accomplishments:

- Brianna:
 - Helped add attributes to JIRA issues.
 - Documented and recorded meeting notes.
- Sung:
 - Finished type tutorial layout
 - Put a blastoise on the front page
- Daniel:
 - GitHub setup and changed the color of the navbar and changed the logo
- Josh:
 - Research and Learn how to use PokeAPI. Figured out how to pull specific data given a large dataset.
- Rose:
 - Manually setup the website hosting

Tasks Completed:

Task Description	Assigned to	Completed? (yes/no)
------------------	-------------	---------------------

Provide url to hosted website domain from AWS	Rose	yes
Finalize background and icon images for site	Brianna	yes
Replace background image on homepage of website and make it's dimensions responsive to the display size.	Daniel	yes
Finish integrating navbar on all pages and add poke-guide logo	Daniel	yes
Reorganize html to extend base	Sung	yes
Create Team Composition page	Rose, Brianna	no
Create HM/TM page	Josh, Daniel	no
Github, create separate branches for testing	Josh	yes
Getting ready to work with flask and connecting it to frontend	Sung, Josh, Daniel	yes
Make spotify song loop indefinitely or make spotify smaller and put it into a better location on the page	Daniel, Josh	No
Redesign nav bar with new color schemes and fonts	Sung	yes
Conduct a user study on Sprint 1 site	Brianna	yes
Add TA's as collaborators	Josh	yes

Before The Next Meeting

Plans:

- Is going to set the navigation bar to our selected font and styling
- Investigate Amazon RDS compatibility with Flask
- Finish HM/TM page (Bri and Rose) and finish TeamComp page (Daniel and Josh)
- Look into deploying site changes automatically

Task Assignments:

Task Description	Assigned to
Make some progress on Team Composition page	Daniel (Main), Josh
See if you can pull more specific data from PokeAPI	Josh

Finish layout of HM/TM page	Brianna, Rose
Look into if AWS RDS is compatible with Flask	Sung, Rose
Individually conduct a user study	Everyone
Finish all the functionality of type tutorial page	Sung, Josh
Fix navbar links	Daniel
Vertically Center navbar logo	Daniel

Minutes from Previous Meeting

When writing our Sprint 2 notes, we analyzed our JIRA report charts based on the rubric. We realized that we need to be checking tasks that we complete off during the SCRUM meetings instead of as we complete them. This is so our Burndown chart has a clear progression of when our SCRUM meetings are taking place.

We also debated the usage of our SpotifyAPI. When planning our user tests and interactions we felt the Spotify frame placement on our site distracted from the features on the site overall. We want to make the feature more subtle so the user does not get distracted from the primary goals of our site. We're currently unsure how to integrate it onto our navigation bar, but we might put this task on the backburner because it's not officially listed until Sprint 3.

Sung asked that we all watch the Python Flask video, as he gave us all a rundown of how to set up our own Flask environments so that we may continue development.
