SCRUM Meeting 3 for Sprint 2

Prepared by: Rose Soriano

Meeting Date: 11/18/21

## Meeting Attendees

1. Joshua Kim
2. Brianna Navas
3. Daniel Chamorro
4. Sung Rung Yoo
5. Rose Soriano

## Meeting Agenda Items

- Talk about updates with website code
- Update group on AWS status
- Decide on a UX update design
- Talk about database implementation

## Status Update Since Last Meeting

Accomplishments:

- Brianna:
  - Wireframe Diagrams
  - Updating navbar based on user feedback
- Sung:
  - Added a text to speech button on the nav bar
  - Researched rapidAPI
- Daniel:
  - Used PG Admin 4 to make tables in the database
- Josh:
  - Also worked on creating tables in the database
  - Progress on populating database
- Rose:
  - Configured the RDS Database and made sure we were all able to connect to it
  - Also setup the infrastructure for automated deployment, still working on some error in Jenkins pipeline

Tasks Completed:

Task Description	Assigned to	Completed? (yes/no)
------------------	-------------	---------------------

Draw out navigation map based on user study findings	Brianna	yes
Clean up HMs and TMs page	Rose	no
Watch Flask App on AWS Instance Video/ Follow through networking tutorial	Rose	yes
Populate Database	Josh	no
On TM/HM page, have a list of TMs or HMs get pulled from the PokeAPI database after the user specifies which types to show	Sung, Daniel, Josh	no
Add TextToSpeech button on main map page	Sung, Daniel, Josh	yes
Create Spotify playlists, either of OG Pokemon music, or Pokemon 25th Anniversary album, or both	Brianna	yes
Research RapidAPI and incorporation	Sung, Daniel, Josh	yes

## Before The Next Meeting

### Plans:

- Finish Sprint 2 Materials
- Finish designing web pages
- Add most of the functionality of each page
- Populate database
- Update frontend based on wireframe
- Fix Jenkins importing error so that pipeline builds correctly

### Task Assignments:

Task Description	Assigned to
Connect database to type Tutorial page and output correct information Based on user's input	Sung
Incorporate wireframe changes onto site	Brianna, Rose
Fix Jenkins import error	Rose
Populate database	Josh, Daniel
On TM/HM page, have a list of TMs or HMs get pulled from the PokeAPI database after the user specifies which types to show	Josh, Daniel, Sung

## Minutes from Previous Meeting

Last meeting was focused on updating the team on what visual and UX/UI changes we made to the site. This included adding shadows to certain buttons on the site so they pop out from the background and are more obvious to the user. We discussed different ways to further incorporate our user feedback into the frontend of the site. This included adjusting our layouts of information. Then, different Bootstrap components like tables were brought up to use to help our frontend look more visually appealing. The team agreed to use the table bootstrap elements. For the backend, we talked about how we want to arrange our database with the PokeAPI information. Josh and Rose drew a diagram of the tables we would use for our database and shared them with the team. We planned to focus on refining our user interface design and populating the database.
